In this study it was analyzed Turkey's foreign trade with Central Asian and Caucasian countries. The development of foreign trade with Central Asian and Caucasian countries over the last 30 years has been examined. The growth effect of foreign trade with both group countries on the economy of our country is demonstrated by econometric modeling. The foreign trade conducted between Turkey and Caucasian countries with respect to foreign trade conducted between Central Asian countries and Turkey has been concluded that provide significantly better growth in the Turkish economy.
